PROJECTS

Vartalaap – Student Social Networking Platform

MERN Stack Developer

- Designed and deployed a full-stack social networking website for student communication and academic networking.
- Developed the backend using Node.js, Express, and MongoDB for secure user authentication and reliable data management.
- Engineered a responsive React frontend and navigated deployment across scalable cloud platforms for high availability.

Personal Expense Tracker

Full-Stack Developer

- Engineered a financial tracking application to monitor personal expenses and categorize spending patterns.
- Implemented RESTful APIs for efficient CRUD operations, ensuring secure data transactions between frontend and database.
- Crafted an intuitive user interface for streamlined data entry and a friction-free user experience.
